

# A course for everyone!

## **Introduction to Bioscience (BIOT 1000)**

**Whether you are a non-science major or a science major, do you want to know about the types of careers in scientific industries and what preparation you need?**

**Do you want to learn some basic scientific and industrial terminology?**

**Do you want to gain knowledge about the current advances and applications in medicine, agriculture, forensics, biomaterials, pharmaceuticals, medical device, biopharma, agriculture, environmental sciences, renewable energy, etc?**

**Offered Every Fall and Spring, The 1-credit BIOT course meets 8 weeks (2 hour sessions per week)**

- Learn about the local scientific industry and academic labs
- Develop appreciation for the scientific basis of the technologies
- Explore educational and employment opportunities, develop job-search skills
- Visit industry and academic labs through field-trips
- Hear from guest-speakers from industry, transfer institutions and hiring agencies
- Learn about basic terminology for effective work in entry-level positions
- Learn about how earning an **A.S. degree in Biotechnology** at MCTC can prepare you for scientific careers in various industry sectors and academia
- How the courses in the A.S. degree programs transfer to 4-year colleges and universities into various majors in several disciplines.
