

**Form A: Recommended to be Completed by All students who plan to pursue
Biotechnology, Chemistry or Biology Programs or Transfer**

**Determining Your Future Interests and Assessing Your Current Educational
Status**

1) Have you made a decision or at least narrowed down your interests, regarding which program or career tracks you want to pursue after completing the transfer courses or graduation at MCTC?

_____Yes, _____No

2) a) If your answer is yes to Q#1, mention what are the program paths or careers you are interested in: _____

b) If your answer is NO to Q#1, think about why you are still undecided, and what kind of assistance should you get to help make up your mind soon. Contact a faculty member to get advice; or contact the Science Advisor (Sandra.Castro-Pearson@minneapolis.edu). Write a plan below:

3) Does your career track of interest require you to have dual degrees, cross training in other programs, within the science disciplines, or in addition to science?

4) For the types of programs or careers you are interested in pursuing:

a) First think about which university you want to transfer to. List them below:

b) Within a particular discipline, are you aware of which track you want to pursue? (Be aware that in almost all departments in a four-year school or university, there are several tracks available).

c) Are you aware of which Math, Science and General Education courses your university of interest expects you to complete, before placing into Junior Year? Do you know which among those courses can be completed here at MCTC?
