

Opportunity for Research!!

Undergraduate Research Courses

Literature- based: CHEM 2722/BIOT 2722 offered in Fall

Lab Course: CHEM 2723/BIOT 2723 offered in Spring

(To be eligible to do lab projects in Spring, you must complete the 2722 course in Fall).

(Transfers as 3000 or 4000 level course depending on which institution you transfer to, including the University of Minnesota)

MCTC provides a great opportunity through the Undergraduate Research Courses for Science Students

The courses help you better position yourself for future opportunities in academic research labs and scientific jobs

- You can register either under the CHEM or BIOT designations
- In Fall, learn the research methodologies and develop your project plan
- In Spring conduct the lab projects under faculty guidance
- Learn the research methodologies that will allow you to better position yourself for future opportunities in research labs or industry
- Present your work during the annual “Science Students Recognition Event” at MCTC
- Present at regional and national conferences and explore publication possibilities
- Get your work recognized!
